DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

There BRIEF DESCRIPTION OF THE VIEWS OF THE DRAWINGS is confusing.

Applicant is suggested to provide a simple and brief explanation of the Figures without including any part reference or description. For example: "Figure 1 is an electrical schematic diagram of the invention". See MPEP§608.01(f). Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 2 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

It is not clear if there are two separate claims or if there is only one single claim comprising of two steps or parts. If a single claim is presented, the claim is not numbered. When multiple claims are presented, proper and consistent numbering must be provided, see MPEP§608.01(j).

4. The following art rejection will be made as best understood by the Examiner in light of the above 35 USC 112 rejections.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bennett (US patent 5,574,319).

As per claims 1 and 2, Bennett teaches the claimed auxiliary self-contained portable lamp or appliance switching circuit assembly consisting the power plug/power socket arrangement; and the switch box housing to remotely control the lamp, wherein power to said lamp is also controlled by a wall switch using no additional sources of electricity to power the circuitry (Figure 6; col. 5, line 55+, including truth table).

7. Art of general nature has been cited for applicant's review.
8. The VHS video provided by applicant explaining how the invention operates has been reviewed and considered by the Examiner.
